Art Unit: 1761

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 16, 2007 has been entered.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 3, 4, 8, 10, 14-19, 23-31, 33, 34 and 38-45 are rejected under 35 U.S.C. 103(a) as being unpatentable over Howarth (WO 03/001931) in view of Hilgren et al and Yang et al as set forth in paragraph no. 2, Paper No. 110906 and in paragraph no. 3, Paper No. 051506. Further, finding the optimum time for treating the carcass exterior (claim 45) would require nothing more than routine experimentation by one reasonably skilled in this art.

4. Applicant's arguments filed January 16, 2007 and the accompanying 1.132 Liimatta declaration have been fully considered but they are not persuasive. Applicant's comments regarding the alleged deficiencies of Hilgren et al are not convincing since Hilgren et al is merely relied upon for the concept of using an inside-outside washing

Art Unit: 1761

procedure to treat poultry carcasses. Moreover, except for claim 45, applicant does not claim any specific contact times for the microbiocidal treatment, and Howarth's 1.5 hour contact time mentioned by applicant is merely preferred and not critical. Thus, applicant's remarks do not patentably distinguish over Howarth.

The Liimatta declaration is not commensurate in scope with applicant's claims, which fail to recite the specific temperatures and the 30 second contact time used in the tests performed in said declaration. Thus, said declaration does not offer a comparison with the closest prior art.

2. All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1761

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
